03 November 2000

Ms. Kelly Schuler National Highway Traffic Safety Administration 400 Seventh St., S.W. Washington, D.C. 20590

Receil Cempelan Number 99V087000 - 6th Quarterly Report

Dear Ms. Schuler.

Please find enclosed the 6th Quarterly Report regarding Recall Compaign #99V087000. This report covers the partod beginning July 1, 2000 and ending September 30, 2000. Alcoe has mailed a second notice to those owners/purchasers that have not responded to the recall notifications. The Second Notice letter is attached and is identical to the initial notice letter, except for the following four changes:

"Second Notice" Identifier

"Second Notice" Identifier
 The updated quantity of 15 wheels recovered as of August 2000,
 The change in the hours of operation of the Alcoa Campaign Center, and
 The NHTSA toll free phone number change.

Peterbilt Motors Company Initially notified you on or about April 23, 1999, that Alcoa Wheel Products International (Alcoa) had shipped 19 forged aluminum truck wheels potentially containing a safety related defect. Alcoa has now successfully recovered and replaced 15affected

If you have any questions or comments, please contact me at (216-641-6315).

Sincerely.

Richard L. Coriss. Quality Manager.

SECOND NOTICE

September 15, 2000

Dear Peterbilt Customer.

RE: SAFETY RECALL FOR 24.5 X 8,25, HUB PILOTED ALUMINUM WHEELS

This notice is sent to you in accordance with the requirements of the National Highway Traffic and Motor Vehicle Safety Act.

Peterbilt Motors Company and Alcoa Wheel Products International have decided that a defect which relates to motor vehicle safety exists in aluminum truck wheels manufactured by Alcoa identified by Heat Lot # K03567. Nineteen wheels from this lot were delivered to Peterbilt and 15 of these have been recovered as of August 2000.

On the behalf of Peterbilt Motors Company, Alcoa is coordinating a Safety Recall of the remaining eight wheels. This recall affects 24.5 x 8.25, hub piloted aluminum wheels (Peterbilt Part 984650, 984651, and 984652). Wheels from the affected Heat Lot can develop an out of roundness condition that can lead to separation of the tire from the wheel. While such a separation can occur under normal loads or inflation, the likelihood of such a separation is increased if the vehicle is operated in severe conditions or above the gross weight or pressure limitations in the owner's manual. If a separation occurs while the wheel is mounted on the vehicle as a single wheel, it could lead to a loss of control or to a vehicle crash without prior warning. If separation occurs while the wheel is not mounted, such as during inflation, serious injury could result unless a safety cage is utilized and the precautions outlined in your owner's manual and OSHA regulations are being followed.

Peterbilt and Alcoa are requesting that you take your truck to an authorized Peterbilt dealer or an independent service center of your choice to have it inspected for the suspect lot of wheels. Peterbilt dealers have the necessary information and forms to handle the inspection of your truck. However, an independent truck service center will be provided the information and form by fax at their request. An independent truck service center must call the Alcoa Wheel Service Center at 888-999-6310 to get the proper documentation. The business

hours are 9:00AM to 3:00PM Eastern time, but it is equipped with a 24 hour voice mail capability. The Wheel Service Center Fax number is 814-226-5379.

Peterbilt and Alcoa will remedy this defect at no cost to you by identifying and replacing affected wheels from this Heat Lot. Replacement wheels are immediately available through Alcoa Wheel Products. Under normal circumstances, Alcoa and Peterbilt estimate that the time required to inspect your truck for the suspect date code is approximately 1 hour shop time, excluding any waiting necessary to get into the shop. Additional inspection time for suspect wheels will be required. The amount of time required will depend on the number of suspect wheels and their location on your chassis.

The suspect aluminum wheels were supplied by Alcoa to Peterbilt in December 1998, and in January 1999. The suspect wheels may have been used on Peterbilt vehicles manufactured between December 15, 1998 and April 16, 1999. Please be assured that the inspection or replacement costs are not the responsibility of the truck owner. Getting your truck inspected is your responsibility.

Alcoa will be pleased to answer any of your questions or ald you in setting up the logistics of getting your truck inspected. For any questions or help, please call the following number:

Alcoa Wheel Service Center 1-888-999-6310

You may submit a complaint to the Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 or call the toll free Auto Safety Hotline at 800-327-4236, if you believe that:

Alcoa, Peterbilt or the authorized Peterbilt dealer to which you take your vehicle have failed or are unable to remedy the defect without charge. Or if

Alcoa or Peterblit have falled or are unable to remedy the defect without charge within a reasonable time after the owner's first tender to obtain replacement.

Sincerely,

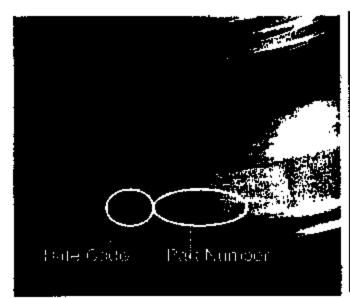

Richard L. Coriiss Quality Manager

Ref: Recall Campaign Number 99V087000 - 8th Quarterly Report

Dear Ms. Schuler,

Please find enclosed the 8th Quarterly Report regarding Recall Campaign #99V087000. This report covers the period beginning January 1, 2001 and ending March 31, 2001. During the last quarter of 2000, Alcoa mailed a second notice to those owners/purchasers that had not responded to the recall notifications.

Unless requested by NHTSA, Alcos will consider this the last formal Quarterly Report that we will submit on this recall. We will continue to perform, monitor, and record our success on this recall and we will retain the documents in our files as records. We will gladly submit these records at any time NHTSA makes such a request.

Peterbilt Motors Company Initially notified you on or about April 23, 1999, that Alcoa Wheel Products International (Alcoa) had shipped 19 forged aluminum truck wheels potentially containing a safety related defect. Alcoa has now successfully recovered and replaced 15 affected wheels.
